SKILLS

BACK-END DEVELOPMENT | Java ▪ Python ▪ PHP ▪ Postman ▪ XAMPP
▪ Node JS ▪ Slim-Framework

FRONT-END DEVELOPMENT | CSS ▪ JS ▪ jQuery ▪ BOOTSTRAP ▪ AJAX
▪ React JS

DATABASE DEVELOPMENT | MySQL ▪ MySQL Workbench ▪
ExpressJS

MISECELLANEOUS | Photoshop ▪ Blender ▪ Game Maker Studio ▪
Linux

VERSION CONTROL | Jira ▪ GitHub ▪ Git ▪ Bash Terminal

PROJECTS

Website Development – Team Project

- Utilized technologies such as HTML, CSS, AJAX, jQuery dataTable Library, bootstrap, MySQL PDO connection, and PHP server-side Language.
- Built a website from scratch for a local business specializing in HDD destruction.
- Divided the header, body, footer into 3 separate parts and by using PHP included the header and footer within every index page.
- Developed a registration & login system, staff management system, and designed a database schema.
- Captured all process requirements & use cases, including importing csv file data into a database, recording signatures during HDD collection.
- Integrated camera functionality to document the destruction process within a webpage and generate proof of destruction certificate.
- Served as Scrum Master, managing progress and process using the Jira & GitHub version control tools.
- Created RESTful APIs using Slim API functions to test CRUD operations with Postman.

Python GUI Application – Project

- A Python GUI application which allows users to add and filter through Magic the Gathering cards within the database.
- The database includes 11 fields such as card rarity, card name, mana color etc. the GUI displays the card information and allows the user to go between each card by clicking next or previous.
- The application contains a second GUI within the GUI which allows users to display all cards together or filter by mana cost/expansion.

EDUCATION

Technological University of the Shannon, Athlone, Co. Westmeath
Third Year - BSc in Software Design with Artificial Intelligence for Cloud Computing.
2020 – Present

St. Conleth's Community College, Newbridge, Co. Kildare
FETAC level 5 in Business and IT.
2015 - 2016

St. Attracta's Community School, Co. Sligo.
2007-2013

COURSE MODULES

Software Development (Java)
Networking
Mathematics for Software Design
Game Development
Computer Applications
Software Development (Python)
Web Development
Software Engineering
Databases
Mobile Application Development
Agile Methodologies
Server-Side Web Development
Ops Systems & Concurrency
Data Visualization
Data Mining & Machine Learning
Management & Organizational Behavior

Interests

Web 3
Financial Markets
League Of Legends
Magic The Gathering

Work Experience:

Gala Petrol Station

Dates: 24 August 2015 – 22 January 2017

Duties:

- Worked a flexible 8-hour shift, mornings & evenings.
- Served customers at the cash register and the deli counter quickly and efficiently.
- Used software to update the total sales of the day to the database, managed credit accounts of customers who have set up fuel accounts and pay once a month.
- Managed the waste in the shop by checking for out-of-date or damaged products during stocking.
- Performed cash drops to the safe every time the till would reach an excess of 400 euro.
- As a key holder I was responsible for opening the petrol station and closing it depending on which shift I had.

Skills Used:

- Teamwork was a very important facet of my work. The daily duties were split amongst us by our supervisor. This led to everything in the shop being done in a timely manner.
- I had to be friendly and approachable to service and help the customers in the shop.
- Time management was key in this position as I had to juggle many responsibilities at once. Going between stocking shelves to servicing a customer.
- Communication is a big part of working in retail. I had to communicate clearly with the customers and my co-workers throughout the day.

C3 Marketing

Dates: 10th January 2015 - 5th April 2015

Duties:

- Worked on behalf of the Irish Cancer Society.
- Door-to-door sales/ fundraising.
- Meeting the requirements of 120+ doors knocked a day.
- Keeping a friendly attitude and educating people on what The Irish Cancer Society does.
- Meeting the weekly sales targets to receive a commission.

Skills Used:

- Communication Skills were essential as I would talk to hundreds of people a day.
- Prospecting skills and negotiation skills were part of the daily routine as I would need to filter out the customers who were interested, as well as work out a payment plan that they felt comfortable with.
- Objection Handling was an auto-response most customers would have strong opinions regarding what the Irish Cancer Society is doing and would not commit due to their beliefs my job was to change their minds.
- Storytelling was crucial as I had to paint a picture of what the Irish Cancer Society is doing around Ireland and all the lives it is helping, all within a few minutes to keep up with the tight schedule we had.
- Active Listening was important since a lot of people have encountered the Irish Cancer Society through very sad events, people get very emotional regarding this subject, so listening is very important as ignoring what the person is saying will come off very rude.
